Short Biodata:

Syam Nukavarapu, Ph.D., is Professor and Chair of Biomedical Engineering at the University of Connecticut (UConn), with joint appointments in the Department of Materials Science and Engineering at UConn and the Department of Orthopaedic Surgery at UConn Health. He received his Ph.D. from the Indian Institute of Science, Bangalore, and completed postdoctoral training at Lehigh University and the University of Virginia. Dr. Nukavarapu directs the *Tissue Engineering Science and Technology (TEST) Laboratory* at UConn and has made significant contributions to the fields of biomaterials, engineered grafts, and tissue engineering. He has authored numerous original articles, book chapters, and prospective reviews. He has also co-edited a tissue engineering textbook, MRS symposium proceedings, and a special issue on the *Future of Biomaterials*. Dr. Nukavarapu serves on the editorial boards of prominent journals in the field, including *Biomaterials, Bioactive Materials, and Tissue Engineering*. He is an elected member of the *Connecticut Academy of Science and Engineering* and a *fellow of BMES and AIMBE*. He has contributed extensively to scholarly, educational, and mentorship activities in the biomedical engineering field.
